

MARK[®] XV XT[™]

BREAKTHROUGH ELECTRIC PERFORMANCE FOR HIGH-VOLUME APPLICATIONS

The next evolution in high-volume coating application—powered by XT Motor and AMPLIFI™ Technology for gas-like performance from any standard outlet (120V or 230V). Faster coverage, smoother finishes, and electric convenience without compromise.

BREAKTHROUGH PERFORMANCE FROM ANY OUTLET

Gas-level output from standard 120V or 230V power.

MAXIMIZE CREW PRODUCTIVITY

Higher flow supports multiple guns and faster job completion.

LESS NOISE, MORE FLEXIBILITY

Quiet electric operation for indoor, occupied, and extended-hour work.

BUILT FOR HEAVY MATERIALS

Engineered to spray the toughest coatings - ideal for Level 5, plasters, joint compound, paints, primers and more!

GAS-LIKE POWER. ELECTRIC CONVENIENCE. BUILT FOR THE BIG JOBS.

XT MOTOR POWER – GAS-LIKE PERFORMANCE FROM ANY OUTLET

- High-torque, low-RPM design delivers consistent output for heavy materials
- Dual voltage flexibility: runs on 120V or 230V
- Quiet electric operation for indoor, occupied, and extended-hour work

AMPLIFI™ TECHNOLOGY – MORE POWER, MORE PRODUCTIVITY

- Up to 50% more usable power from the same outlet
- Selectable amperage helps prevent nuisance tripping on any breaker

ENDURANCE™ VORTEX PUMP WITH PROCONNECT™ – BUILT FOR UPTIME

- Oversized passages handle plaster, Level 5, joint compound, and heavy mixes with ease
- ProConnect lets you swap pumps in minutes to keep crews spraying

TURBOCLEAN™ AND WATCHDOG™ PROTECTION – CLEAN FAST AND PROTECT YOUR INVESTMENT

- Clean 3X faster using less fluid
- WatchDog automatically shuts down to help prevent costly damage

**BUILT FOR HIGH-VOLUME
APPLICATIONS. ENGINEERED
TO KEEP CREWS MOVING.**

Model	Part No.
Mark XV XT Standard	18H400
Mark XV XT ProContractor	18H401

PSI	3300 PSI
GPM	2.8 GPM
Maximum Tip Size	.053"
Voltage Range	120V/230V Flex Voltage
Supported Materials	paint, plaster, drywall compound, intumescent fireproofing, primers and more
